

The text of this document is an accurate copy of what was filed by the initiative proponent with the Secretary of State for assignment of a serial number. The accuracy of code in amendatory sections has not been verified.

INITIATIVE 395

I, Sam Reed, Secretary of State of the State of Washington and custodian of its seal hereby certify that, according to the records on file in my office, the attached copy of Initiative Measure No. 395 to the Legislature is a true and correct copy as it was received by this office.

AN ACT Relating to increasing traffic flow; amending RCW 46.61.165 and 82.08.020; adding a new section to chapter 35.21 RCW; adding a new section to chapter 47.01 RCW; adding a new section to chapter 81.100 RCW; adding a new section to chapter 82.12 RCW; adding a new section to chapter 46.68 RCW; creating new sections; and providing an effective date.

BE IT ENACTED BY THE PEOPLE OF THE STATE OF WASHINGTON:

POLICIES AND PURPOSES

NEW SECTION. **Sec. 1.** During these tough economic times, the people deserve a common sense proposal to increase traffic flow by implementing basic traffic congestion relief strategies and improving Washington's transportation system with better use of existing public resources.

This measure would open carpool lanes to all traffic during non-rush hours, require cities to synchronize traffic lights on heavily-traveled arterials, and expand emergency roadside assistance and vanpools by dedicating 2.9% of existing vehicle sales taxes to fund these purposes.

We all pay taxes for our carpool lanes, so everyone should be allowed to use them at least some of the time. This measure strikes a

reasonable balance by allowing our carpool lanes to be open to everyone during non-rush hours meaning midday and evenings on weekdays and all day and all night on weekends. Existing road capacity must be utilized to maximize its effectiveness. How can we increase road capacity and increase traffic flow on our most congested highways and roadways without spending billions of dollars? By opening our carpool lanes to everyone during non-rush hours. This will quickly, significantly, and cost-effectively increase traffic flow and relieve traffic congestion on our most congested highways and roadways and illustrate that increased road capacity results in decreased traffic congestion.

To increase traffic flow, each city must synchronize the traffic signals on heavily-traveled arterials within its jurisdiction. Heavily-traveled arterials would include routes of regional and local significance and include major and secondary arterials. What's the use of having a top-notch Medic One system if it simply gets stuck in traffic? Synchronizing traffic lights ensures increased traffic flow and better safety. Getting goods to and from our ports and other freight mobility necessities are hampered by stop-and-go traffic at successive traffic lights. Increasing traffic flow is critical for freight mobility. Synchronization of traffic signals is a coordinated set of timing plans for a group of signals on an arterial used to facilitate smooth traffic flow. The objective of synchronizing traffic signals is to allow progression through the arterial with the fewest stops at intersections, while minimizing delay for the side street. Synchronizing traffic lights creates more uniform speeds along streets, increases traffic flow, reduces time delays at intersections, and creates opportunities for traffic from the side streets to safely enter the main street. This act helps cities fund these improvements.

Traffic accidents and other temporary obstructions greatly hinder the smooth flow of traffic and must be responded to and cleared as quickly as possible. This involves coordination, communication, equipment, and manpower. A blocked highway or roadway can result in miles of backups and long delays. A large portion of all congestion is caused by collisions, disabled vehicles, spills, and other events that impede the normal flow of traffic. Any incident has the potential for creating secondary incidents such as vehicles running out of fuel or overheating, or collisions that occur in the backup as a result of lane changing and rapid braking. The quicker the original incident is cleared, the less time motorists and response personnel are exposed to

traffic hazards and the possibility of a secondary collision. The Washington state Department of Transportation and other government entities and contracted companies, including tow truck operators, must expeditiously assist in the safe, prudent, and quick removal of vehicles and other debris involved in traffic accidents or other temporary obstructions. The people want the roads cleared and drivers helped as quickly as possible to restore the normal flow of traffic. This act provides expanded funding for these programs.

Vanpools are the most cost-effective mode of public transportation in the United States. Greater use of vanpools will increase traffic flow by reducing the number of vehicles on the road while providing maximum flexibility for the user. Yet, traditionally, only capital costs have been subsidized; inexplicably, subsidizing operating costs, such as fuel and insurance, have not been explored to create incentives for new and expanded use of vanpools. This act provides expanded funding for the state to provide financial incentives to cover a portion of the operating costs of vanpools in cities and counties throughout the state.

To help fund these increase-traffic-flow policies, this act dedicates 2.9% of existing vehicle sales taxes to a dedicated account that will pay for costs associated with opening carpool lanes to everyone during non-rush hours, synchronizing traffic lights on heavily-traveled arterials in cities throughout the state, and expanding funding for emergency roadside assistance and vanpools.

Year after year, Washington voters have repeatedly rejected the business-as-usual, the-only-solution-is-a-tax-increase mentality. During these tough economic times, the people deserve a common sense proposal to increase traffic flow by implementing basic traffic congestion relief strategies and improving Washington's transportation system with better use of existing public resources.

Decreased traffic congestion ensures a growing, thriving economy which is essential in generating the tax revenue necessary to fund government services.

This measure will make travel times faster immediately on our highways and roadways, increase traffic flow, decrease traffic congestion, increase safety and freight mobility, and result in fewer vehicles idling thus decreasing carbon emissions, all by maximizing the use of existing public resources.

**INCREASES TRAFFIC FLOW BY OPENING CARPOOL LANES TO EVERYONE
DURING NON-RUSH HOURS**

Sec. 2. RCW 46.61.165 and 1999 c 206 s 1 are each amended to read as follows:

The state department of transportation and the local authorities are authorized, subject to the requirements in this section, to reserve all or any portion of any highway under their respective jurisdictions as carpool lanes, including any designated lane or ramp, for the exclusive or preferential use of public transportation vehicles or private motor vehicles carrying no fewer than a specified number of passengers when ~~((such))~~ the limitation will increase the efficient utilization of the highway or will aid in the conservation of energy resources. Regulations authorizing ~~((such))~~ exclusive or preferential use of a highway facility ~~((may be declared to be))~~ are effective ~~((at all times or at specified times of day or on specified days))~~ only at the specified times ~~((or))~~ and on the specified days designated in this section. In order to decrease traffic congestion, existing road capacity must be utilized to maximize its effectiveness. Therefore, on and after December 10, 2008, all carpool lanes shall be opened during non-rush hours for use by all vehicles otherwise lawfully abiding by the rules of the road of this state. This policy shall be in effect for any carpool lane in effect on January 1, 2008, and for any new or expanded carpool lanes designated after January 1, 2008, on any highway, freeway, or roadway in the state.

For the purposes of this section:

(1) "Carpool lanes" are high-occupancy vehicle lanes, which includes express lanes, off-ramp bypass lanes, and on-ramp bypass lanes on any highway, freeway, and roadway in the state.

(2) "Non-rush hours" mean midday and evenings on weekdays and all day and all night on weekends.

(a) "Midday on weekdays" is between the hours of 9:00 a.m. and 3:00 p.m. on Monday through Friday;

(b) "Evenings on weekdays" are between the hours of 6:00 p.m. and 6:00 a.m. on Monday through Thursday; and

(c) "All day and all night on weekends" is between the hours of 6:00 p.m. on Friday and 6:00 a.m. on Monday.

(d) During hours not specified as non-rush hours under this section, the use of carpool lanes by a motor vehicle is limited to

those carrying two or more passengers, except in the case of a motorcycle, which may use a carpool lane if carrying one or more passengers.

(e) A governmental entity, authority, or agency shall not avoid the requirements of this section by redesignating a carpool lane as another name or designation. The people want governments, authorities, and agencies to abide by the policies, purposes, and intent of this section; the people oppose efforts to circumvent them.

This section does not restrict the operation of RCW 46.44.080, 46.61.100, or 46.61.135, thus continuing restricted truck usage of city streets. Violation of a restriction of highway usage prescribed by the appropriate authority under this section is a traffic infraction.

**INCREASES TRAFFIC FLOW BY REQUIRING CITIES TO SYNCHRONIZE
TRAFFIC LIGHTS ON HEAVILY-TRAVELED ARTERIALS**

NEW SECTION. **Sec. 3.** A new section is added to chapter 35.21 RCW to read as follows:

To increase traffic flow, each city must synchronize the traffic lights on heavily-traveled arterials within its jurisdiction. Heavily-traveled arterials include routes of regional and local significance and include major and secondary arterials as defined in RCW 35.78.010. To help pay for these improvements, the state shall allocate funding to cities from the dedicated revenue in the Increase Traffic Flow Account created in section 8 of this act to efforts by cities after January 1, 2008 to synchronize their traffic lights and increase traffic flow.

**INCREASES TRAFFIC FLOW BY EXPANDING FUNDING
FOR EMERGENCY ROADSIDE ASSISTANCE**

NEW SECTION. **Sec. 4.** A new section is added to chapter 47.01 RCW to read as follows:

To increase traffic flow, the department of transportation and other governmental entities must rapidly respond to traffic accidents and other obstructions on highways, roadways, and streets, clearing these accidents and obstructions as expeditiously as possible. To increase traffic flow, the department of transportation and other governmental entities must receive expanded funding for emergency roadside assistance. To increase traffic flow, the state shall

allocate additional funding to the department of transportation and other governmental entities from the dedicated revenue in the Increase Traffic Flow Account created in section 8 of this act to expand funding for emergency roadside assistance. To maximize flexibility and response times, the state, the department of transportation, and other governmental entities may contract out emergency roadside assistance services to private companies, including tow truck operators.

**INCREASES TRAFFIC FLOW BY EXPANDING FUNDING
FOR VANPOOLS IN HEAVILY CONGESTED COUNTIES AND CITIES**

NEW SECTION. **Sec. 5.** A new section is added to chapter 81.100 RCW to read as follows:

To increase traffic flow, vanpools in heavily congested counties and cities must receive expanded funding to create incentives to increase the attractiveness of using vanpools to citizens by covering a portion of vanpool operating costs, such as fuel and insurance. To increase traffic flow, the state shall allocate additional funding to help cover a portion of the operating costs from vanpools from the dedicated revenue in the Increase Traffic Flow Account created in section 8 of this act.

**DEDICATES 2.9% OF EXISTING VEHICLE SALES TAXES TO HELP FUND
THE OPENING OF CARPOOL LANES TO EVERYONE DURING NON-RUSH HOURS,
REQUIRING CITIES TO SYNCHRONIZE TRAFFIC LIGHTS ON HEAVILY-
TRAVELED ARTERIALS, AND EXPANDING FUNDING
FOR EMERGENCY ROADSIDE ASSISTANCE AND VANPOOLS**

Sec. 6. RCW 82.08.020 and 2006 c 1 s 3 are each amended to read as follows:

(1) There is levied and there shall be collected a tax on each retail sale in this state equal to six and five-tenths percent of the selling price.

(2) There is levied and there shall be collected an additional tax on each retail car rental, regardless of whether the vehicle is licensed in this state, equal to five and nine-tenths percent of the selling price. The revenue collected under this subsection shall be deposited in the multimodal transportation account created in RCW 47.66.070.

(3) Beginning July 1, 2003, there is levied and collected an additional tax of three-tenths of one percent of the selling price on each retail sale of a motor vehicle in this state, other than retail car rentals taxed under subsection (2) of this section. The revenue collected under this subsection shall be deposited in the multimodal transportation account created in RCW 47.66.070.

(4) For purposes of subsection (3) of this section, "motor vehicle" has the meaning provided in RCW 46.04.320, but does not include farm tractors or farm vehicles as defined in RCW 46.04.180 and 46.04.181, off-road and nonhighway vehicles as defined in RCW 46.09.020, and snowmobiles as defined in RCW 46.10.010.

(5) Beginning on December 8, 2005, 0.16 percent of the taxes collected under subsection (1) of this section shall be dedicated to funding comprehensive performance audits required under RCW 43.09.470. The revenue identified in this subsection shall be deposited in the performance audits of government account created in RCW 43.09.475.

(6) The taxes imposed under this chapter shall apply to successive retail sales of the same property.

(7) The rates provided in this section apply to taxes imposed under chapter 82.12 RCW as provided in RCW 82.12.020.

(8) Beginning on December 10, 2008, 2.9 percent of the taxes collected in subsection (1) of this section on the retail sale of motor vehicles as defined in subsection (4) of this section shall be dedicated and deposited in the Increase Traffic Flow Account created in section 8 of this act.

NEW SECTION. **Sec. 7.** A new section is added to chapter 82.12 RCW to read as follows:

Beginning on December 10, 2008, 2.9 percent of the taxes collected under RCW 82.12.020 based on the rate in RCW 82.08.020(1) shall be dedicated and deposited in the Increase Traffic Flow Account created in section 8 of this act.

CREATES THE INCREASE TRAFFIC FLOW ACCOUNT

NEW SECTION. **Sec. 8.** A new section is added to chapter 46.68 RCW to read as follows:

The Increase Traffic Flow Account is hereby created in the state treasury. All receipts from sales and use tax revenues specified in

RCW 82.08.020(8) and section 7 of this act must be deposited in the account. Moneys in the account may be spent only after appropriation. Expenditures from the account may be used only:

(1) To pay for costs associated with the opening of carpool lanes to everyone during non-rush hours as required under RCW 46.61.165, including new or modified electronic and nonelectronic signage, lane striping, and shoulder improvements, including bumpers;

(2) To pay for costs associated with synchronizing traffic lights on heavily-traveled arterials as required by section 3 of this act; and

(3) To provide expanded funding for emergency roadside assistance as required under section 4 of this act and for expanding funding for vanpools as required under section 5 of this act.

NEW SECTION. **Sec. 9.** This act does not inhibit or prohibit the department of transportation or any other state or local government agency or body from expending other revenue from other sources to fund opening carpool lanes to everyone during non-rush hours, synchronizing traffic lights on heavily-traveled arterials, or expanding funding for emergency roadside assistance and vanpools as required under this act.

MISCELLANEOUS

NEW SECTION. **Sec. 10.** The provisions of this act are to be liberally construed to effectuate the intent, policies, and purposes of this act.

NEW SECTION. **Sec. 11.** Subheadings used in this act are not any part of the law.

NEW SECTION. **Sec. 12.** If any provision of this act of its application to any person or circumstance is held invalid, the remainder of the act or the application of the provision to other persons or circumstances is not affected.

NEW SECTION. **Sec. 13.** This act shall be known and cited as the Increase Traffic Flow Initiative of 2008.

NEW SECTION. **Sec. 14.** This act takes effect December 10, 2008.

--- END ---
